

PLANT 'N' GO™

FERTILIZER TABLET

SLOW RELEASE
FERTILIZER TABLET

FERTILIZER GROUP 1 REG. NO: K 10860 ACT NO. 36 OF 1947

PLANT'NGO™

Easy to use planting fertilizer tablet providing nutrients that immediately boost the growth and development of newly planted seedlings, young and established trees. The application is simple and targeted; it allows an accurate dosage of the nutrients and reduces the leaching of nutrients beyond the reach of the root systems.

AREA OF USE

Plant'NGo™ is suitable for use in forestry, horticulture and agriculture. It is used as a planting supplement for seedlings, young or mature trees. Its slow-release properties assist with the development of healthy roots and vigorous top growth.

EASY APPLICATION

Application of Plant'NGo™ is easy and convenient. The fertilizer tablet is placed in the planting hole at time of planting. The easy application method for Plant'NGo™ eliminates the need to measure small quantities of dry material.

NEWLY PLANTED TREES

Dig a hole.

Drop tablets at the root zone of the plant at the time of planting.

Place seedling in planting hole, cover and water thoroughly.

ANALYSED NUTRIENTS g/kg

■ Calcium (Ca) ■ Nitrogen (N) ■ Phosphorous (P) ■ Potassium (K)

YOUNG TREES

Place tablets evenly spaced out on the edge of the rootball in the planting hole and water thoroughly.

MATURE TREES

Place tablets evenly spaced at the drip line for each tree.
Make holes at least 50mm-100mm deep.
Insert tablets and cover with soil.
Water tree thoroughly.

HOW PLANT'NGO™ WORKS

 Tablet contains urea formaldehyde, bone-meal, natural humic acids & special combination of macro, secondary and micro nutrients.

 The nutrients are released by moisture and microbial action resulting in a long-term release of N, P, K & Ca.

 The special combination of nutrients provides a kick start to plant growth.

 The natural humic acids in the formulation improves the soil and contributes to good uptake of the fertilizer.
